CASTER CONCEPTS

Beyond Standard.

INDEPENDENT SUSPENSION

Each wheel operates on separate axles and separate legs.

Steel and aluminum casters available.

VARI-FLEX DESIGN

- Dramatically reduces vibration
- Shock absorption capabilities even with loads that exceed rated capacity
- Reduces shimmy, dynamic bounce and resonance, even on empty carts

ALUMINUM CONSTRUCTED CASTERS

- Entire caster is aluminum, including the yoke, swivel section and wheel core
- Corrosion-resistant and resistant to chemicals
- Aesthetically appealing

SHOCK ABSORPTION

- Significantly reduce vibration and noise
- Reduce risk of damage to load

WHEEL CONFIGURATIONS

- Diameters from 3 inches to 16 inches
- Single or Dual Wheel
- Custom polyurethane formulations

DESIGNED FOR MANY USES

- Ideal in wet, humid or damp environments
- Perfect for applications that require overall weight reduction
- Resistant to many chemicals or liquids
- Helps keep load level on cracked, uneven or bumpy flooring
- Great when appearance is important
